Business Websites Made Easy with Joomla!

What is Joomla?

Joomla! is a:

- Content Management System
- Application Framework
- A website Swiss-Army knife
- Available under the GNU/GPL License

...because open source matters

Business Websites Made Easy with Joomla!

What's Joomla's History?

Joomla forked from Mambo due to licensing and oversight concerns in 2005. Joomla is today overseen by Open Source Matters, Inc. OSM is a US-incorporated non-profit organization.

OSM's website is at opensourcematters.org.

The entire award-winning development team behind Mambo moved to Joomla, and is today led by Johan Janssens.

Joomla!™

Templating with Joomla!

Joomla's templating system simply wraps HTML and CSS around the internal PHP calls that pull in the dynamic content.

Content-driven Communities with Joomla!

Let's define some traits common to online communities:

- User Profiles and detailed account information
- Forums/Message Boards
- User subscriptions
- Differing subscription levels (up-sell from free membership to paid membership)

User Profiles and Account Information

Extension: Community Builder

- Adds additional information fields to user accounts.
- Allows membership listings with complete profiles (MySpace)
- Integrates with a wide variety of other third party extensions, including forums, newsletter components, private messanging, and more.
- Highly customizable

Joomla/Mambo Community Builder

The Community Builder suite extends the Joomla! and Mambo website user
management systems and allows to manage those users.

Key features include: extra fields in profile, enhanced registration workflows, user
lists, connection paths between users, admin defined tabs and user profiles, image
upload, front-end workflow management, integration with other components, like
PMS, Newsletter, Forum, Galleries.
